DECLARATION OF CONFLICT MINERALS

Digital View Limited designs and supplies LCD controller boards for commercial and industrial customers worldwide. We recognise our customers' obligations under Section 1502 of the US Dodd-Frank Wall Street Reform and Consumer Protection Act and under Regulation (EU) 2017/821, and we support them through due diligence in our own supply chain.

Digital View does not mine, smelt, refine or directly purchase tin, tantalum, tungsten or gold (3TG). These metals are present in our products only through purchased components and materials, such as solder, plating, metal alloys and electronic components.

We survey our relevant suppliers using the Responsible Minerals Initiative's Conflict Minerals Reporting Template (CMRT), review their responses against our expectations, and follow up where information is incomplete. We require our direct suppliers to source 3TG from smelters and refiners whose due diligence practices have been validated by an independent third-party audit programme, such as the Responsible Minerals Assurance Process.

Our 2026 CMRT (version 6.6) lists 194 smelters and refiners identified by our suppliers. We have not yet identified every smelter in our supply chain, so we cannot yet confirm the origin of all 3TG in our products, or rule out that some of it originates from the Democratic Republic of the Congo, an adjoining country, or another conflict-affected and high-risk area. We continue to work with our suppliers to close this gap.

Digital View is not required to file a conflict minerals disclosure with the US Securities and Exchange Commission or under the EU regulation. Our completed CMRT is published at www.digitalview.com/compliance. We will update this declaration and the CMRT as our supplier information improves.

Enquiries about this declaration may be sent to Barry Lui, Product Manager, at barry.lui@digitalview.com.
